16.10 December

16.10.1 Joining Team Astalavista.box.sk - Official Project Re-Launch - Join us Today!

(2020-12-01 23:32)

[1]

Dear blog readers,

8747

I wanted to take the time and effort and let you know that I've officially joined forces with

Astalavista.box.sk which is the original Astalavista.box.sk search engine for hackers circa

1997 and which is one of the World's most popular Web sites for hackers and security experts

where I'm currently acting as a Project Operator and where we've recently launched a

high-profile and flagship search engine for hackers and security experts with the idea to make

it publicly accessible and online for free potentially reaching out to thousands of loyal users

across the globe on a daily basis which can be publicly accessed from the front page of the

portal or from [2]here including a flagship Dark Web search engine which can be accessed

from the home page.

Currently running projects on the original Astalavista.box.sk include:

• [3]Security and Hacking Forum

• [4]Security Newsletter

• [5]Crowd-funded Virtual Reality application for hackers and security experts

• [6]Hacking and Security Blog

You can also browse the old version of the re-surrected portal [7]here including the actual

[8]Call for Papers. It's also a privilege and an honor to let you know that we're currently hiring

and looking for possible full-time Team Members in a variety of categories where we intend to

share some of the advertising revenue with current and upcoming Team Members.

You can also go through some of the following blog posts to catch up in terms of what we've

been up to in terms of research:

•

• [9]A Brief Introduction to the New Box.sk Project – or Who's Dancho Danchev?

• [10]Enter a Bold New World of Hacking and Security – Embrace the Cybertronics VR Plat-

form for Hackers and Security Experts Today! We're Hiring!

• [11]Introducing Box.sk's Flagship Hacking and Security Search Engine! We're back!

• [12]Announcing a New Hacking and Security Collaborative E-book Writing Initiative – Join

Us Today!

• [13]Announcing the Official Launch of Box.sk's Hacking and Security IRC Network! Join Us

Today!

• [14]New Box.sk Online Security and Privacy Talk-Show featuring Dancho Danchev – Listen

in Today!

• [15]Announcing Dancho Danchev's Exclusive Personal Hacking and Security Research

Memoir – Free Copy Available!

• [16]Announcing Box.sk's World Hacker Global Domination Group (WHGDG) Call for Secu-

rity and Privacy Papers and Call for Innovation

• [17]Upcoming Box.sk High-Profile YouTube Livestream – The Scene and The Security In-

dustry The Way We Know It – Bookmark the Link Today!

8748

• [18]Introducing Box.sk's Flagship "Data Paradise" Old-School KGB-Style Dial-In Intranet

16.10.2 Greetings from Bulgaria - 2019 - An Intelligence Analyst's Perspective

(2020-12-01 23:34)

[1]

8749

[2] Anyone there?

In a savagery peasant-aria which can be best described as the country where crime is

supposedly prolific based on psychotropic substances and a "newspaper" courtesy – you wish

you wish – of the basement of "someone" that thought that the CIA is running the country

thanks to a "described" but supposedly "pre-scribed" leader of the country - increasing the

longevity of peasant-aria land to continue vomiting in the very nothing? Not fair my friend. It

shouldn’t be surprising that nothing is ever taking place at all.

Keep reading.

- Key Summary Points

• **Do you know what TOR is?**

8750

• **Are you "based" on the Intelligence?**

Can you best describe Bulgarian Intelligence Services? Pretty simple. It’s you r father’s ugly

Intelligence book with a vibrator on it - namely - an apparatus.

• **When did you first discover Facebook?**

Let’s spit and vomit and take a photo of it - isn’t this fancy? Or shall we spank your digital

existence based on the clustered irrelevance of your degraded social vomit? Dare to press

a button once again and We Shall Prevail to the bottom of the irrelevant obfuscation of your

dare existence? Not fancy.

• **Do you know who Yavor Kolev is?**

And since when did it became fashionable to know who Misho Mishov is? Think twice and

[3]**feel free to skip these Congressional Hearings**.

• **Do you have a career?**

D o you "go" to work? Do you have a "career"? Can you make the difference? You wish.

• **Are you heading to the airport?**

- Don’t be in a hurry - there’s a toilet.

Relocation and full-time cybercrime research security blogging and threat intelligence

position proposals can be directed to dancho.danchev@hush.com

Stay tuned!

16.10.3 ManTech Introduces Newly Lauched Cyber Security "Space Range" - An Anal-

ysis (2020-12-01 23:36)

[1]

Have you ever dreamed of launching an [2]offensive cyber warfare payload from [3]Space?

Keep reading.

[4]

8752

It appears that the newly launched ManTech's "[5]Space Range" cyber security simulation is

truly capable of offering a fully-realistic cyber security and information security simulation

environment that's successfully capable of launching an offensive cyber warfare payload from

Space potentially signalling the presence of a sophisticated offensive cyber warfare adversary

that's truly capable of making an impact and causing havoc on a wide-spread scale.

" *ManTech has embraced the challenge of identifying and capturing the unique threats*

and vulnerabilities in the space domain with our newest offering, the ManTech Space Range.

Built upon the success of ACRE®, ManTech's innovative and fully operational cyber range,

we are expanding our robust, scalable and hyper-realistic range to encompass the unique

requirements of a cyber infrastructure supporting a space enterprise. ManTech's ACRE range

and highly trained team of space and cyber professionals are unrivaled within the IC and DoD.

Our offense-informed cyber defense is an integral part of how we replicate any space, ground

and network environment at any classification level to tackle today's toughest cyber threats.

ManTech's Space Range provides "the right stuff" for customers to train to defend America's

vital space enterprise from the ground up. Most importantly, ManTech's Space Range provides

leaders with the confidence that critical space communications, navigation and intelligence

gathering capabilities will be available and reliable when needed most. "

A logical question emerges - what does really constitute a cyber war from Space?

Man-

Tech's initiative and research in this area can truly prove valuable to U.S National Security

including its client-base for the purpose of empowering them with the necessary "know-how"

and operational capabilities to launch offensive cyber warfare campaigns from Space.

Stay tuned!

16.10.4 The Armadillo Phone - A Security Review (2020-12-01 23:39)

[1]

Dear blog readers,

As many of you know I've joined forces with [2]**Team Armadillo Phone** in the fight against

cybercriminals including nation-state and rogue and malicious including possibly fraudulent

cyber adversaries for the position of Security Blogger in 2019 and I wanted to say big thanks

to COO [3]**Rob Chaboyer** and CEO [4]**Kelaghn Noy** for bringing me on board and for initiating

a series of video conversations to better help them understand my motivation for joining the

company and what exactly I can bring on board.

8754

Technical and Qualitative Threat Modeling and Practical Security Audit of the Armadillo Phone - An Analysis

30.10.2019

—

Dancho Danchev

Among my first responsibilities were to possibly include an actual Security Audit and ac-

tual Security Advice and Recommendation including practical implementation advice on new

Privacy and Security themed related features actual reaching out to current and future cus-

tomers including active posting of new and innovative Security

Research at the [5]**company's**

blog.

[6]

In this post I'll provide an in-depth Security Review of the Armadillo Phone in terms of Privacy

and Security features including their relevance and importance in today's modern cyber

8755

threat adversaries dominated Internet-based communication ecosystem including an in-depth

introduction into some of the key features that I might be definitely looking forward to

implementing and offering practical advice on in terms of new Privacy and Security features

that might greatly assist new and future customers on their way to achieve a decent degree

of Privacy and Security in their Internet-based communications.

Key Features of the Device include:

- **Tamper-Resistant Packing**

- **Device Inspection**

- **Secure Hardware**

- **Multiple Passwords**

- **Zero Day Protection**

- **Security Peripherals**

Among my key proposals that I sincerely hope will eventually make their place on COO

Rob Chaboyer and CEO Kelaghn Noy's desk are:

• **Security Researcher Working Space or a Security Module -** the

basic idea here would be to

offer a built-in full-disclosure reader application including automatic subscription to major

and popular Information Security and Hacking Mailing Lists.

• **Built-in RSS Reader** - the main idea here would be offer Armadillo Phone users to ability

to take advantage of a built-in RSS reader with pre-defined set of major and high-profile

Security and Provicacy Content Providers

• **Security and Privacy Including National-Security Journalists' Opt-In Directory** - have you

ever wanted to directly reach out to a high-profile Security Privacy or National Security

type of journalist for the purpose of sharing with them your opinion on a particular piece

of to actually share a news tip? This is the main purpose behind this particular feature.

• **Covert Channels** - the main purpose behind this features is to allow Armadillo Phone users

in particular journalists or hacktivists the opportunity to secure and convertly transmit

information that's basically impossible to track down intercept

• **Steganography** - the main purpose behind this feature is to allow Armadillo Phone users

with the opportunity to use an alternative secure communication channel that's basically

impossible to intercept track down and censor

8756

Key Security and Privacy Features of the Device include:

- **AES-256-XTS block-level FDE**
- **Block-level FDE instead of Android's file-based encryption**
- **Scrypt work factors increased**
- **Minimum 8-character alphanumeric password**
- **Completely software-based**
- **Keymaster and gatekeeper disabled**
- **Normal password for deniable encryption**
- **Secret password stored at randomized offset**
- **Secret volume is hidden inside unused portion of decoy data**
- **Wipe password in footer to erase device**
- **Separate lockscreen password**
- **Password verification order randomized at runtime to prevent timing attacks**
- **Enhanced KASLR and userland ASLR**
- **Increased ASLR entropy**
- **Several PaX patches ported**
- **Zygote uses exec() spawning instead of fork()**
- **Improved SELinux rules**
- **Hardened malloc implementation**
- **Stack and heap canaries detect overflows**
- **Enhanced FORTIFY _SOURCE implementation**
- **Function pointer protection**
- **Restrictive compile-time sanitization**
- **Additional attack surface reduction**
- **All connections made using pinned TLS 1.2 connections with**

high-entropy 4096-bit cer-

tificates

• Metadata can be further protected by enabling optional VPN

• Verify encryption keys using manual verification, QR code, SMP or NFC

• Chat uses [7] OMEMO encryption

8757

• Email uses PGP encryption

• Email uses randomized subjects

• Email uses encrypted connection to keyserver and mailserver

• Email requires 4096-bit PGP keys

• Radio Sentinel: Monitors WiFi networks for ARP poisoning. Monitors cellular networks

for 2G networks, performs sanity checks and compares cellular towers to a database of

known network

• RAM Sentinel: Monitors temperature to prevent cold-boot attacks

• Theft Sentinel: Connects to anti-theft beacon over BLE, alarms both beacon and phone

if disconnected. If phone isn't unlocked or beacon isn't reconnected within 5 minutes

the phone will shutdown.

Based on my current experience with the device which I've recently started using for the pur-

pose of keeping in touch with friends and colleagues I can easily say that this is one of the most

advanced and technically sophisticated mobile security device that

can be easily obtained from

[8] here and I sincerely hope that my research and security knowledge and technical knowledge

expertise will prove highly valuable to what the Team at Armadillo Phone are currently doing.

Stay tuned!

16.10.5 Joining Team Armadillo Phone! (2020-12-01 23:39)

Dear blog readers,

It's a pleasure and an honor to let you know that I've recently joined forces with Team

[1]**Armadillo Phone** in the fight against sophisticated nation-state and rogue cyber threat

actors for the position of Security Blogger targeting mobile devices on their way to compromise

sensitive and often classified personal information and that I'll be definitely looking forward to

making impact with the company through the publication of high-quality security and cyber

threat research including the active education and spreading of information and knowledge to

the company's clients on their way to further protect their sensitive and often classified data

from mobile threats courtesy of a multi-tude of malicious and fraudulent adversaries.

8759

Among my responsibilities will include active cyber threat an nation and rogue cyber ad-

versary research including actual client outreach in terms of Security Blogger including the

actual work and eventual implementation of new never-published and seen-before privacy

and security features including the actual Security Audit of the device in terms of possible

Threat Modelling flaws and actual practical solution and advice-oriented implementation of

new privacy and security features next to the usual cyber nation-state and rogue cyber actor

type of threat analysis and research that I've been doing throughout the past decade.

Perfect timing to say big thanks to COO [2]**Rob Chaboyer** and CEO [3]**Kelaghn Noy** for

bringing me on board and for actually taking the time and effort to go through my proposal

and actually initiate a video conversation with me for the purpose of working together.

My initial idea would be reach out to the company's client-base in terms of possible se-

curity threats outreach including the active production of high-quality security and cyber

adversary research targeting mobile devices at the [4]**company's blog** including the pro-

duction of a Threat Modelling Scenario Research Analysis which I intend to publish at the

company's blog including an actual practical and solution-oriented Security Audit of the device

next to the actual introduction of new privacy and security features.

I will be definitely looking forward to making an impact with the company and I'll be

definitely looking forward to continue publishing the high-quality and never-published before

type of research analysis at my personal blog.

16.10.7 Guess Who's Still Running the Show? (2020-12-01 23:42)

[1]

Dear blog readers,

I've recently came across to a very [2]**informative presentation** courtesy of a friend [3]**Jeffrey**

Carr from TaiaGlobal that lists me as a major competitor in Cyber Threat Intelligence next to

the DHS. Outstanding! Keep it coming Jeff and don't forget to check out this post detailing the

inner workings of the infamous [4]**Kneber Botnet**.

How to set them straight? Stay tuned!

16.10.8 Dancho Danchev's Blog - Open Call for Blog Contributors and Guest Bloggers

(2020-12-01 23:44)

UPDATE: Do you know which is one of the World's most popular Security blogs and who's

running it?

Guess what - you've been reading it all along. Ever since I started this blog in December, 2005

for the purpose of impressing my girlfriend and greatly inspired by a successful venture with

Astalavista Security Group circa 2003-2006 I've received over 5M page views courtesy of a

loyal base of users to whom I owe a great debt of gratitude for keeping track of my research

and following my comments - in real-time. The time has come to expand and eventually launch

a new set of products and services including a possible Advertising Inventory - therefore I've

decided to launch an Open Call for Blog Contributors including Guest Bloggers. Interested in

writing at this blog? Feel free to approach me - dancho.danchev@hush.com

16.10.11 Exposing Emotet's Modern Infrastructure - A Case Study on Tracking Down

and Shutting Down Abusive Malware In Direct Cooperation with Abuse De-

partments (2020-12-01 23:55)

[1]

In this post I'll officially attempt to bring down and take offline the Emotet botnet including to

actually provide never-published before OSINT type of research analysis on the actual C &C

infrastructure behind the Emotet botnet which is one of the most prolific botnets up to

present day with the idea to attempt a coordinated take down attempt in direct cooperation

with multiple international ISPs and their associated abuse departments for the purpose of

bringing it offline.

16.10.12 AI-powered Cyber Robots That Fight Disrupt and Undermine Cybercrime -

Check out the Framework! (2020-12-02 15:28)

16.10.13 Dancho Danchev's Blog - Sharing the Crown Jewels of my OSINT and Threat

Intelligence Research - Request Private Access Today! (2020-12-05 16:27)

Dear blog readers,

This is Dancho and I wanted to touch base with everyone and let everyone know that I've been

thinking of switching my personal blog to private invite-only mode where users who request

access can basically subscribe themselves to an upcoming flood of high-quality and never-

published before OSINT and threat intelligence which basically represents a huge portion of

the crown jewels of my research which I intend to share with a specific and highly-targeted

audience which might be interested in subscribing to my personal blog in a private invite-

only mode which would greatly motivate me to continue doing my research and actually earn

the necessary financing which could assist me in my daily work activities where the primary

motivation behind switching my personal blog to private invite-only mode is to reach out to a

highly qualified and technical audience who might be interested in paying a modest fee for the

purpose of obtaining access to my personal blog.

Here's how it works - readers who've been reading my personal blog throughout the past

decade and might be interested in obtaining private invite-only access which starts from Jan-

uary, 2021 can approach me with the following information:

Name:

Position:

How long have you been reading my blog?

What's your primary motivation for obtaining private and invite-

only access to my personal

blog?

How much would you and your organization be willing to pay to obtain access to my blog on

a monthly or yearly basis?

I've decided to present a basic pay-as-you-go business model which aims to gather high-quality

vetted audience where I intend to present

16.10.16 Rogue Facebook applications distribute adware (2020-12-06 03:47)

BitDefender is reporting on

What's so special about this bogus Facebook application? It's a rebranded version of a similar

adware-serving Facebook app from last week.

Numerious Facebook users are already posting

"Redhot sexy girl in thong dancing [HQ]"

NEW ONE:

"Sexy masseur gone out of control! [HQ]."

Name of application:

'MXF Movi | Facebook'

http://www.facebook.com/apps/application.php?id=106744506034490

8800

http://apps.facebook.com/mxfmovi/

http://downloads.allokfree.com/FLVDirect.exe

- The rogue application requires you to allow it to access your profile

- Since the self-repblicain is abusing trust, you may want to reconsider allowing access to sent

by your friends

- It offers your video content that is only viewable with their malware-sih app – ow convinient

indeed

-

-’

16.10.17 Exposing a Pay-Per-Install and Rogue Spyware Command and Control

Database Interface (2020-12-06 04:10)

16.10.18 Sampling 419 Advance Fee Scams Activity - Part Three (2020-12-10 18:23)

Continuing the "[1]Sampling 419 Advance Fee Scams Activity" series of blog [2]posts I’ve de-

cided to offer yet another peek inside their malicious and fraudulent activity and publish part

three of the series.

Dear blog readers,

It’s been a while since I’ve last posted a quality update and I’ve decided to share with everyone

the results of a recent initiative where I aim to provide actionable threat intelligence on some of

the key client-side exploits serving kits in terms of actual MD5s for the purpose of empowering

AVs and IDS snort vendors with the necessary threat intelligence to actually track down and

"connect the dots" on multiple client-side exploits serving campaigns located on their servers

or actually targeting their clients and customers internationally.

In this post I’ll provide actionable threat intelligence on some of the market leading client-side

exploits serving kits including actual MD5s with the idea to empower vendors and organizations

with the necessary technical data to help them stay on the top of their game.

Sample MD5s for some of the market leading client-side exploits serving kits currently in

circulation:

16.10.22 Exposing Modern Client-Side Exploits Serving Kits - An AV and Snort IDS

MD5 List Compilation - Part Two (2020-12-12 14:16)

[1]

Dear blog readers,

This is the second post part of the "[2]Exposing Modern Client-Side Exploits Serving Kits - An

AV and Snort IDS MD5 List Compilation" series where I intend to share actionable threat in-

telligence with vendors and organizations in the context of offering and providing actionable

10310

MD5s for high-profile and popular hacking tools currently in circulation with the idea to assist

vendors and organizations on their way to track down and prosecute the individuals behind

these campaigns.

Sample MD5s for some of the market leading hacking tools currently in circulation:

16.10.24 Exposing Modern Client-Side Exploits Serving Kits - An AV and Snort IDS

MD5 List Compilation - Part Four (2020-12-12 14:18)

[1]

10883

Dear blog readers,

This is the fourth post part of my "[2]Exposing Modern Client-Side Exploits Serving Kits - An

AV and Snort IDS MD5 List Compilation - Part Three" blog post series where I intend to share

actionable threat intelligence with vendors and organizations with the idea to assist them in

protecting their networks and the networks of their clients and customers.

In the fourth post part of the series I intend to provide additional MD5s for some of the high-

profile and currently popular and in circulation hacking tools with the idea to assist vendors

and organizations on their way to properly protect their infrastructure

and the infrastructure of

their clients and customers.

Sample MD5s for some of the currently active hacking tools currently circulating in the wild:

16.10.25 Exposing Modern Client-Side Exploits Serving Kits - An AV and Snort IDS

MD5 List Compilation - Part Five (2020-12-12 14:19)

[1]

11074

Dear blog readers,

This is the fifth post part of my "[2]Exposing Modern Client-Side Exploits Serving Kits - An AV and

Snort IDS MD5 List Compilation - Part Four" blog post series where I intend to share actionable

threat intelligence with vendors and organizations with the idea to assist them in protecting

their networks and the networks of their clients and customers.

In the fifth post part of the series I intend to provide additional MD5s for some of the high-

profile and currently popular and in circulation hacking tools with the idea to assist vendors

and organizations on their way to properly protect their infrastructure and the infrastructure of

their clients and customers.

Sample MD5s for some of the currently active hacking tools currently circulating in the wild:

16.10.27 Exposing a Diverse Portfolio of Malicious and Fraudulent Name Servers -

An Analysis (2020-12-12 14:22)

[1]

Dear blog readers,

In this post I've decided to share a diverse portfolio of fraudulent and malicious name servers

circa 2008 that are known to have participated in various rogue and malicious software serving

campaigns.

Sample portfolio of rogue fraudulent and malicious name servers known to have participated

in rogue and malicious campaigns circa 2008:

16.10.28 Exposing a Massive and Diverse Portfolio of "Tax Forms"

Themed Malware

and Blackhat SEO Serving Domains (2020-12-12 14:22)

Dear blog readers,

I've decided to share a massive and diverse portfolio of rogue and potentially malicious do-

mains portfolio utilized by cybercriminals while participating in a blackhat SEO tax forms

themed rogue and malicious software serving campaigns circa 2008.

In this post I'll provide actionable intelligence on the infrastructure behind it and discuss in-

depth the tactics techniques and procedures of the cybercriminals behind it.

Sample portfolio of rogue and malicious tax forms themed domains portfolio currently in

circulation circa 2008:

16.10.29 Exposing Modern Client-Side Exploits Serving Kits - An AV and Snort IDS

MD5 List Compilation - Part Seventh (2020-12-12 14:22)

[1]

Dear blog readers,

This is the seventh post part of my "[2]Exposing Modern Client-Side Exploits Serving Kits - An

AV and Snort IDS MD5 List Compilation - Part Six" blog post series where I intend to share

actionable threat intelligence with vendors and organizations with the idea to assist them in

protecting their networks and the networks of their clients and customers.

In the seventh post part of the series I intend to provide additional MD5s for some of the high-

profile and currently popular and in circulation hacking tools with the idea to assist vendors

and organizations on their way to properly protect their infrastructure and the infrastructure of

their clients and customers.

Sample MD5s for some of the currently active hacking tools currently circulating in the wild:
